Jonatan Elias Vargas Ortiz

Full-Stack Developer — React, Vue, TypeScript & PHP

Spain contact@vaor.dev linkedin.com/in/vaor github.com/vaorme
Valid work permit in Spain

Summary

Full-stack developer based in Spain with professional experience since 2020. I build production web applications with React and TypeScript on the frontend and PHP, Laravel, Node.js, or Python on the backend. I also work with SQL and NoSQL databases, integrations, and automation workflows.

Experience

Mid-Level Developer
Aug 2024 — Aug 2026

LinkTIC

- Developed new modules and features for a production PHP application
- Handled support and maintenance for the production application
- Collaborated with a multidisciplinary team using Azure DevOps and Git branching workflows
- Worked with frontend teams using Quasar.dev (Vue.js) to build and maintain the UI
- Prepared feature branches for production deployments following change control processes

Web Developer
2023 — 2024

Código Dinámico

- Built and maintained WordPress websites with custom functionality
- Developed interactive animations and dynamic frontend features
- Provided direct client support and custom development solutions

Web Developer
2020 — 2023

Desarrollandolo

- Built custom PHP websites, e-commerce stores (Shopify), and landing pages (Wix) for multiple clients
- Developed dynamic video content using Remotion.dev
- Worked directly with clients gathering requirements, providing support, and delivering custom solutions
- Gained experience with multiple database systems: MySQL, PostgreSQL, MongoDB, and Firebase

Projects

Interpreter Private repository Live
Progressive Web App for real-time broadcast translation, powered by the Gemini Live API — organizers speak into their mic while attendees pick a language and hear a live AI-translated audio stream over WebSockets and HLS.
Next.js · React · TypeScript · WebSockets · Gemini Live API · WebRTC · Prisma

Voiri Private repository Live
Laravel + React (Inertia) platform for publishing and reading serialized content — creator tools, a browser-based reader, communities, commerce (Stripe, PayPal, Mercado Pago), and gamification (XP, ranks, achievements).
Laravel · PHP · React · TypeScript · Inertia.js · Tailwind CSS

The Hym Private repository
Bilingual (EN/ES) Progressive Web App for the Seventh-day Adventist hymnal, with synced lyrics, karaoke-style highlighting, offline support, and an internal dashboard for managing hymn metadata and audio.
Next.js · React · TypeScript · Supabase · Tailwind CSS

Education

Self-Directed Web Development

2018 — 2020

PHPost open-source community

Personal learning through PHPost, an open-source CMS built with PHP and Smarty. I learned HTML, CSS, jQuery, JavaScript, PHP, and MySQL by creating layouts, adapting features, and debugging my own projects before starting my professional career in 2020.

Certifications

EF SET English Certificate 63/100 — C1 Advanced · Reading and listening · Jul 2026

Languages

Spanish — Native English — EF SET 63/100 — C1 reading/listening; intermediate speaking (self-assessed)
